### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakagawa (USPN 5100726) in view of Hood , III et al (USPN 6049469) as set forth in the previous Office action mailed 10/6/03.

3. Applicant's arguments filed 12/17/03 have been fully considered but they are not persuasive. Applicant argues that the carbon fibers of the instant invention must be pitch carbon fibers in order to thermally conductive. This argument is misplaced because instant independent claim 9 does not recite the use of pitch carbon fibers. Furthermore, the instant specification does not disclose the required use of pitch carbon fibers. It should be noted that Nakagawa teaches away from the use of pitch carbon fibers because of its shape, i.e., whisker shaped fibers is better. It also should be noted that the housing of Nakagawa made from injection molded carbon fiber impregnated resin is conductive. See col 2, lns 35-39 and col 3, lns 42-45. Applicant also argues that the housing of Hood , III et al cannot be net shape molded but does not give a reason as to why it cannot be net shape molded. Since net shape molding allows for complex shapes to be molded such as moldings having undercuts, grooves and ribs, applicant's argument is unclear. Examiner cannot fully rebut applicant's argument without a full explanation as to why applicant believes the housing of Hood , III et al

Art Unit: 1732

must be stamped and cannot be net shaped molded. It should be noted that Hood , III et al do not limit the making of the housing by only cutting material into the shapes needed to make the housing.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **EDMUND H. LEE** whose telephone number is 571.272.1204. The examiner can normally be reached on **MONDAY-THURSDAY FROM 9AM-4PM.**

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on 571.272.1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
